Kisel Group (Holding)   October 2017 – August 2019
IT Application Development Staff
- Developing web base application
- Create automation for data retrieval to support application needs.
- Perform application maintenance & testing.

SKILLS AND CERTIFICATION

SKILLS
- **Tools:** Microsoft Office, VSCode, Navicat, Termius, JMeter, Github, Figma, Docker.
- **Hard Skills**: Programming Language (Golang, Javascript, Java), Framework (Gin, Express, Springboot), Database (MySql, Elastic Search), Data Stream (Apache Kafka).
- **Soft Skills**: Time Management, Effective Communication, Problem Solving.

- **Languages**: Fluent in Indonesian, passive in English

CERTIFICATION

- **Inhouse Training Sales & Marketing Performance (2025)**
  Jakarta, Kiselgroup
- **Belajar UI/UX dari Dasar (2024)**
  Jakarta, Detikcom
- **Pelatihan Golang Professional Academy Digital Talent Scholarship (2022)**
  Jakarta, Kominfo - Digitalent - Progate
- **Java Fundamental & ISO (2017)**
  Jakarta, Artivisi
- **Oracle:SQL & Extended SQL with Programming (2013)**
  Depok, Gunadarma University
- **Microsoft Visual Basic.NET (2013)**
  Depok, Gunadarma University

OTHER EXPERIENCE

Team Taskforce Rakit Coopin   2025
Kiselgroup

- Design, build, and test cooperative applications according to the specified requirements.
- Design and manage the necessary technology infrastructure to run the application, such as servers, databases, and networks.
- Implement security measures to protect the application and cooperative member data from cyber threats.
- Perform updates and develop new features based on user feedback and changes in cooperative needs.

Team Taskforce Dashboard   2024
Kiselgroup

- Development of a dashboard as a monitoring tool for the entire movement and business performance dynamics of Kisel Group.
- Formulating steps for the development of existing business, including market analysis, customer segmentation, and updated marketing strategies.
- Implementing an interactive dashboard to monitor accounts receivable status in real-time.
- Providing a workflow diagram for the project implementation stages, from system integration to testing and the launch of the PPOB feature in the application.

ACHIEVEMENT

- **1st Place Innovation Awards - Rakit Ecosystem:** Coopin (Perkoperasian), Trast (Management Transportation), Kru (Human Resource)
- **Apihub:** Switching system for transaction PPOB.
- **Bayaraja:** Application for reporting transaction voucher telkomsel and PPOB.
- **Marissa & Kamila:** A human resource management platform designed to help companies manage various aspects of employee administration.
- **MyKisel:** Kisel membership application that can be monitored by each user including information related to membership and various services provided
- **KiselBiz:** An application designed to help merchants manage the products they sell.
- **Barakah:** A community application designed to support the needs of every Muslim community, reducing the need for multiple apps while fulfilling all worship and other activity requirements.
- **Integration Wallet & Payment Gateway:** LinkAja, Bayarind, Ovo, Virtual Account.
